

How Green is Our Future? Complicated.

The Edwin Black Show

Season 2, Ep. 5: February 4, 2021 3:00pm ET via Zoom.

Green living and ecopolitics bring us a future full of dreams and nightmares. Wind turbines, electric cars, new nuclear plant designs, hydrogen, alt fuels, geothermal, ethanol versus natural gas, petroleum, and coal, each with its advocates and detractors—generally based on money and politics. Fuel Freedom Foundation chairman **Yossie Hollander** and Auto Channel co-publisher **Marc Rauch** join **Edwin Black**, author of the award-winning *Internal Combustion: How Corporations and Governments Addicted the World to Oil and Derailed the Alternatives* to give the grounded facts.
